### SUMMARY

Detail-oriented **Artificial Intelligence Engineer** with a published **IEEE research paper** on NLP. Proven ability to build, ship, and deploy complete **AI-powered applications** from concept to production. Seeking to apply deep skills in **Python**, **NLP**, and **full-stack development** to solve challenging problems.

### EDUCATION

**G.H. Rasoni College of Engineering and Management**  
*Bachelor of Technology in Artificial Intelligence; CGPA: 8.96/10.0*  
**Champavati Junior College**  
*Higher Secondary Education (HSC); Percentage: 78.5%*

Nagpur, India  
*2023 – 2027 (Expected)*  
Beed, India  
*2020 – 2022*

### PROJECTS & PUBLICATIONS

**Gondi WordNet** | *Python (Flask), PostgreSQL, NLP, Render* | [View Project](#)

- **Architected** a comprehensive linguistic database (**WordNet**) for the under-resourced Gondi language to advance **computational linguistics** research.
- **Engineered** and **deployed** a **full-stack web application** providing a public-facing UI for data interaction, available at [gondi-wordnet.onrender.com](https://gondi-wordnet.onrender.com).
- Authored a paper on the Gondi WordNet's **architecture** and **implementation**, **published** in the proceedings of the **2024 International Conference on Artificial Intelligence and Quantum Computation-Based Sensor Application (ICAIQSA)**.

**NoteDeck** | *Python (Flask), Vanilla JS, PostgreSQL, Supabase, Google AI, OpenRouter* | [View Project](#)

- Developed **NoteDeck**, a full-stack, AI-powered web application that generates interactive flashcards from user notes, PDFs, and web articles to enhance learning efficiency.
- Engineered a robust **Python (Flask) backend** to manage user authentication, data persistence with **PostgreSQL**, and seamless integration with multiple AI models (**Google Gemini**, **OpenRouter**).
- Built a responsive and modern **vanilla JavaScript frontend** featuring rich content support (Markdown, LaTeX, code highlighting) and a tiered subscription model with **Razorpay** for payment processing.

**Broadband-Digital** | *Python (Flask), Tailwind CSS, Jinja* | [View Project](#)

- Developed a comprehensive, full-stack web application for a local broadband service provider, enabling customers to browse the service online.
- Implemented key user-facing features, including new connection requests, browsing service plans, and secure online payment processing with custom payment gateway.
- Constructed the application using a **Flask** backend, with a responsive and modern frontend styled with **Tailwind CSS** and templated with **Jinja**.

**Endless Cube Runner Game** | *Unity3D, C#* | [view on itch.io](#)

- **Engineered** a **3D endless runner game** in **Unity3D/C#**, handling all aspects from physics to UI design.
- **Spearheaded** the project from concept to **deployment** on [itch.io](https://itch.io) within a demanding one-week timeframe.

### TECHNICAL SKILLS

**Languages:** Python, JavaScript, Java, C, C#, HTML/CSS, SQL

**Frameworks & Libraries:** Flask, Tailwind CSS, PyMuPDF, newspaper3k, Marked.js, KaTeX, Prism.js

**Databases:** PostgreSQL

**Developer Tools:** Git, GitHub, Linux, Unity3D, Google Colab, Vite

**Cloud, Auth, & Payments:** Supabase, Vercel, Render, Razorpay

**Areas of Interest:** Artificial Intelligence, Machine Learning, Backend Development, NLP

### ACHIEVEMENTS & EXTRACURRICULARS

Completed 2 levels of examination in Indian Classical Music (Harmonium), demonstrating nine years of disciplined practice.
